I tried to fly this and the chopper crashes within 5 seconds?? Im not sure how to stop this, so I cant play the game at all. I have tried different manouvers flying low and turning but it explodes which tends to make it boring as it dosnt help you or tell you how to hover or fly safetely except to remain below a certain height. I didnt even intend to buy this game some how it was in my checkout when I purchased another game. If I can get the patience to try to work out how to fly it with out crashing andhaving to restart every five seconds maybe I will be able to write something positive.
