, team kill, area where you can heal, destroy in a radius of invisibility, multis in a radius, shield you yourself a 50% damage, kill in a radius, kill everything in a radius, kill and taunt, force controll, invisibility, polymorph but very few of those are useful steam link is a client that handles games, wine is an emulator that runs windows only apps Sonderblade: i.e. command line arguments for everything  
Steam | chui\_ chui\_: Valve have officially announced that they are developing Steam and are working with Ubuntu during their development, see for further details, see for install instructions, you can also join #ubuntu-steam for discussion, steam link I thought did support linux now Sonderblade: "nice - n 6 vle" :) I would just like to know if the problems I'm having are normal, or if it's because I'm not getting a full gaming experience as I have a lot of games on steam chui\_, if you play on linux, then it's expected that you would experience problems ehowlett, I'd like to know if the problems are caused by my hardware or if the system itself chui\_, on windows there is no problem, so yes, likely your hardware If I'm having trouble playing games on my HP Graphics Card then is it a hardware issue, or is it related to linux? I've had some trouble playing other games on linux, mostly games for Xbox !wine | chui\_ chui\_: WINE is a compatibility layer for running Windows programs on GNU/Linux - More information: - Search the!AppDB for application compatibility ratings - Join #winehq for application help - See!virtualizers for running Windows (or another OS) inside Ubuntu I don't want to
